AAID wants you to feel the magic at 63rd annual meeting

The American Academy of Implant Dentistry’s 63rd Annual AAID Implant Dentistry Educational Conference aims to shine a light on the magical artistry and science of dental implant practice in a naturally magical location: Orlando, Fla.

Beginning on Wednesday, Nov. 4, the AAID conference aims to set the curve in implant dentistry. This year’s AAID Implant Dentistry Educational Conference Keynote Speaker, Nina Tandon, PhD, will intrigue, motivate and challenge the current thinking of implant dentistry and more.

In her eye-opening keynote address, she will explain the process of growing tissue and transplants, and the future of medical science. With the help of manufacturing and information technology, we are on the verge of being able to grow human tissue. Her presentation, "Body 3.0," is all about growing our own body parts.

The entire day on Wednesday will be devoted to the future of implant dentistry with a half-day session consisting of 14 different programs covering "New Trends, Techniques and Technology." Following Tandon’s keynote, such luminaries in the field as Peter E. Murray, BSc (Hons), PhD, Tomas Albrektsson, MD, PhD, DDS, and Nelson Pinto, DDS, will provide in-depth and varied views of the future of implant dentistry.

Known as “the organization that provides practical education for the practicing implant dentist™,” the AAID conference delivers on that brand promise with two-and-a-half days of programming, including coverage of digital dentistry, soft-tissue management and treatment planning.

Through main podium programs, workshops, including a dozen hands-on opportunities, 10 concurrent sessions and dental team training, attendees can earn as much as 18 implant-specific hours of C.E.

More than 1,000 implant dentistry professionals will be in attendance at the Hyatt Regency Orlando. In addition to learning from world-class clinicians and presenters, attendees will have the opportunity to interact with more than 125 vendors of products and services they utilize in dental practices across America every day.

Doctors and guests will also enjoy time to network and learn from each other in a variety of social functions including two group lunches, the Welcome Reception, Implant World Expo Reception and the always popular President’s Celebration at the conclusion of the conference.

Those interested in attending should plan to register onsite in the Regency Ballroom Foyer of the Hyatt Regency Orlando, located at 9801 International Drive. More information about the programs, speakers and activities at the conference can be found at www.aaid.com.

If you are unable to attend the 63rd annual conference, mark your calendar for AAID’s 64th Annual Implant Dentistry Educational Conference to be held Oct. 21–24, 2015, in Las Vegas.

Established in 1951, the AAID is the only dental implant organization that offers credentials recognized by federal and state courts as bona fide. Its membership, which exceeds 4,800, includes general dentists, oral surgeons, periodontists and prosthodontists from the United States and in more than 40 other countries. Contact AAID at www.aaid.com or at (312) 335-1550 or (877) 335-AAID (2243).
