Deep in the heart of Texas

The Henry B. Gonzalez Convention Center will be transformed into a 100-chair dental clinic on Sunday to treat about 1,000 adults and children who have limited financial resources or are otherwise unable to visit a dental office. Patients will be treated from 5:30 a.m. to 5:30 p.m.

This Mission of Mercy (MOM) event comes to San Antonio as part of ADA 2014 and includes more than 1,000 volunteer dentists, hygienists, assistants, students and community workers from across Texas and the nation. Almost 30 sponsors are providing financial and in-kind support. The event is held in cooperation with the ADA Foundation and the San Antonio District Dental Society.

There is no doubt that America faces a dental health crisis. This year, more than 75 million Americans won’t visit a dentist even though nearly half of people older than 30 suffer from some form of gum disease and an estimated 25 percent of children younger than 6 already have cavities. According to 2012 U.S. Census data, 17.2 percent of Texans live in poverty. For a family of three, that is income less than $18,500 per year. Caring for those in need is woven into the fabric of the dental profession. The ADA estimates that dentists provided $2.16 billion in free or discounted care in 2007 alone. Nationwide, MOM programs have delivered approximately $88 million in free care to 151,000 people since 2008.

The 2012 Mission of Mercy held in San Antonio was the largest health-care event in the city’s history, treating 1,183 patients at an estimated $732,311 worth of free dental treatment.

ADA 2014 kicks off with more than 300 C.E. courses and 550 exhibitors

From learning to networking to shopping to exploring San Antonio, there is a lot going on here at the ADA 2014. Check out the more than 300 continuing education courses, including the Education in the Round and C.E. opportunities on the show floor, or stop by to chat with the more than 550 exhibitors showcasing their state-of-the-art products and services today through Saturday in the exhibit hall. In addition, more than 150 related dental groups will also convene during the meeting.

One highlight of the week comes this morning at the Alamodome, when the ADA welcomes former President George W. Bush to ADA 2014 with the Opening General Session and Distinguished Speaker Series.

DENTSPLY Pharmaceutical delivers a comprehensive line of local anesthesia products for your practice. With such a wide variety, you’ll find what you need for any procedure. Discover our full line of local anesthesia at www.dentsplypharma.com.

To learn more, call us at 1-800-225-2787.
“We are excited and honored to have (former) President Bush speak at the annual meeting,” said Dr. James E. Galati, 2014 chair for the Council on ADA Sessions. “I believe his charitable work and experiences can inspire all dentists, no matter what their political beliefs are.”

Exhibit hall C.E. opportunities

The ADA offers attendees a productive and innovative take on the power lunch by presenting different options to earn continuing education credit on the exhibit hall floor.

- The new Specialty Pavilion will feature lectures followed by a meet-and-greet, where attendees can ask questions of the speakers, engage in peer-to-peer discussion and network. The programs will be held in Hall C/D, booth No. 1471.
- Learn more about dental office design and see the winners of the 2014 Dental Office Design Competition at the Dental Office Design Center in Hall C/D, booth No. 1016.
- See and test the 19 Best of Class winners at the 2014 Pride Institute Technology Expo and earn C.E. at 12 free one-hour continuing lectures in Hall A/B, booth No. 4139.
- See live-patient demonstrations, from digital impressions to in-office milling, at the Live-Patient CAD/CAM stage in Hall C/D, booth No. 1043.
- Learn about safe and effective use of laser technology at the Laser Pavilion, Hall A/B, booth No. 3427.
- Hear a presentation from one of 14 up-and-coming speakers on a wide range of topics at the New and Emerging Speaker Series in Hall A/B, booth No. 3831.
- View the work of dental student scientists at the 54th ADA/DENTSPLY Student Clinician Research Program from 1–3 p.m. Saturday on Level 2, outside Room 217.
- Spend an hour learning how to improve your curing light technique at the ADA Professional Product Review Booth. The course includes a short presentation and time at one of four hands-on stations. It can be found in Hall A/B, booth No. 2614.

ADA 2014 mobile app

The new mobile app is now available. Sync your course schedule to the mobile app and get updated course information, exhibitor listings, show specials and more. Check your mobile app store to download it.
Welcome to ADA 2014, and congratulations on actively moving your understanding and professional success forward!

It is only through excellent education that we individually grow and develop as dental health professionals and, through that, build a practice that is not just successful but delivers comprehensive and high-quality care.

As a patient, I expect the best care I can find. As a doctor, I want to deliver the best care possible.

That takes us to the power of continuing education, and as doctors, we are faced with many choices in continuing education.

As a way to introduce you to the Las Vegas Institute for Advanced Dental Studies, or LVI, I want to outline what LVI is about and what void it fills in your practice. The alumni who have completed programs at LVI were given an independent survey, and unlike the typical surveys, 99.7 percent said they love practicing dentistry, and of those surveyed, 92 percent enjoy their profession more since they started their training at LVI. That alone is reason enough to go to LVI and find out more.

While the programs at LVI cover the full breadth of dentistry, the most powerful and life-changing program is generally reported as being Core I, or “Advanced Functional Dentistry — The Power of Physiologic Based Occlusion.” This program is a three-day course that is designed for doctors and their teams to learn together about the power of getting their patients’ physiology on their side.

In this program, doctors can learn how to start the process of taking control of their practice and start to enjoy the full benefits of owning a practice and providing high-quality dentistry. Regardless of whether it is a solo practice or a group setting, every doctor can start the process of creating comprehensive care experiences for his or her patients.

We will discuss why some cases doctors are asked to do are actually dangerous ones to restore cosmetically. We will discover the developmental science behind how unattractive smiles evolve and what cases may need the help of auxiliary healthcare professionals to get the patient feeling better.

The impact of musculoskeletal signs and symptoms will be explored, and we will look at how the supporting soft tissue is the most important diagnostic tool you have — not simply the gingiva but the entire soft-tissue support of the structures, in the mouth and also in the rest of the body.

A successful restorative practice should not be built on insurance reimbursement schedules. An independent business should stand not on the whims and distractions of a fee schedule but rather on the ideal benefits of comprehensive care balanced by the patients’ needs and desires.

Dentistry can be a challenging and thankless business, but it doesn’t have to be. Through complete and comprehensive diagnosis, there is an amazing world of thank yous and hugs and tears that our patients bring to us when we change their lives. The Core I program at LVI is the first step on that journey. That’s why when you call, we answer the phone: “LVI, where lives are changing daily!”

LVI Core I three-day course designed for doctors and their teams to learn together

By Mark Duncan, DDS, FAGD, LVIF, DICOI, FICCMO, Clinical Director, LVI

HENRY SCHEIN®
Advancing your skills to advance your career

By Aspen Dental Staff

In a recent study among 200 dentists, the vast majority expressed interest in ongoing training to advance their skills. In fact, 81 percent of experienced dentists and 92 percent of recent dental school graduates said they would like to continue improving their skills.

Furthermore, 41 percent of experienced dentists and 62 percent of recent graduates would like an assigned mentor to help in their development.

Whether it’s maintaining accreditation to meet licensure requirements or learning new techniques to improve the quality of care, even the most seasoned dentists recognize the value of continuing education.

The question remains how to find proper training that is not only useful but convenient given your busy patient schedule and the other responsibilities required to manage and grow your practice. With private practice, dentists often have to squeeze in training at night through online courses or other resources. What’s more, recent graduates often have to learn the ropes of a new practice with little supervision or mentorship.

The vast network of dentists and specialists at Aspen Dental, however, offers the structure and resources to give you plentiful learning and mentorship opportunities. For example, the Doctor Development Program at Aspen is offered to all new dentists. It was designed by a group of Aspen Dental practice owners who identified key components for transitioning newly hired dentists to Aspen Dental and then fostering their development through each step in their career.

Upon joining Aspen, all dentists are assigned an Aspen mentor doctor who creates a personalized training program based on experience level and continues to serve as an advisor on an as-needed basis. Prior to even starting your position with Aspen, you spend a full four weeks with your mentor in his or her office, which offers you the most supportive onboarding experience possible.

Your first year might include clinical experience and supervision to refine your capacity for complex procedures, treatment planning and case presentations, plus consultations with your mentor and online education to earn free ADA CERP-accredited C.E. credits.

Throughout your entire career, Aspen Dental provides advanced clinical education to stay abreast of the latest devices, techniques and protocols. You also get access to Aspen’s Practice Ownership Program, which may include workshops or a special ownership retreat for developing your managerial and leadership skills.

Best of all, because Aspen handles the administrative, marketing and business aspects of running a practice, you have the time to focus on your development.
All Smiles. Every Step of the Way.

From a first dental visit to hygiene, orthodontics and implants, the CareCredit credit card can make it easier for families — mom, dad and the kids — to get care when they want and need it. And CareCredit gives them a financing resource they can use again and again* as credit becomes available.

Help more families achieve healthy, happy smiles. For more ways to optimize CareCredit in your practice, contact your Practice Development Team by calling 800-859-9975, option 1, then 6.

Shofu Dental Corp. announces the latest addition to its extensive product line: the EyeSpecial C-II Digital Dental Camera.

The EyeSpecial C-II digital dental camera is designed exclusively for dentistry and features 12 megapixels and eight shooting modes that are easier, faster and more reproducible to ensure the best quality of images are achieved.

The EyeSpecial C-II offers a high-performance, 49 mm close-up lens, intuitive one-touch operations, an ultra-lightweight sleek body design and a large LCD touchscreen, which allows the user to view and scroll through images effortlessly, even with a gloved hand.

Designed to produce superb image quality, EyeSpecial C-II has exceptional depth of field range, fast autofocus and anti-shake capabilities, as well as infrared, UV and anti-reflection filters to help achieve those high-quality images.

Although lightweight, the camera is very durable and will withstand the occasional mishandling. It is scratch- and scuff-resistant, as well as water and chemical proof, which is essential for infection control in the office.

Created for dental and orthodontic photography, case presentations and at the bench in a laboratory, EyeSpecial C-II is user friendly and can be held comfortably with one hand, freeing the other to use a cheek retractor or mirror.

Included with the EyeSpecial C-II is a 4 GB SD XC card, but the camera is also compatible with an Eye-Fi Pro X2 card, allowing images to be automatically transferred and uploaded onto a computer, tablet or smartphone.

With a retail price of $2,795, EyeSpecial C-II comes with a 4 GB SD XC card, four AA batteries, a Kenko 49 mm macro lens for close-up shots, a computer connection cord and hand strap and a flash calibration card.

Included with the EyeSpecial C-II is a 4 GB SD XC card, but the camera is also compatible with an Eye-Fi Pro X2 card, allowing images to be automatically transferred and uploaded onto a computer, tablet or smartphone.

BIOLASE #1256 The World Leader in Dental Lasers

You're Invited!

Meet new BIOLASE CEO, Jeff Nugent, tonight from 5:30 – 6:30 PM in booth #1256. Discuss the changes that have been made to help optimize the dental experience for both patients and clinicians.

Why is everyone #BeamingWithBiolase? Stop by booth #1256 to find out!
Dental isolation is one of the bedrock challenges in dentistry. The mouth is a difficult environment in which to work. It is wet and dark, the tongue is in the way, and there is the added humidity of breath, which all make dentistry more difficult.

Proper dental isolation and moisture control are two often overlooked factors that can affect the longevity of dental work—especially with today’s advanced techniques and materials. Leading dental isolation methods have long been the rubber dam—or manual suction and retraction with the aid of cotton rolls and dry angles. Both of these methods are time and labor intensive—and not particularly pleasant for the patient.

Enter Isolite Systems: Its dental isolation technology delivers an isolated, humidity- and moisture-free working field as dry as the rubber dam but with significant advantages, including better visibility, greater access, improved patient safety and a leap forward in comfort. Plus, it can do everything two quadrants at a time.

The key to the technology is the “Isolation Mouthpiece.” Compatible with Isolite’s full line of products, the mouthpiece is the heart of the system. It is specifically designed and engineered around the anatomy and morphology of the mouth to accommodate every patient, from children to the elderly.

The single-use Isolation Mouthpieces are available in five sizes and position in seconds to provide complete, comfortable tongue and cheek retraction while also shielding the airway to prevent inadvertent foreign body aspiration. Constructed out of a polymeric material that is softer than gingival tissue, the mouthpieces provide significant safety advantages, and their ease-of-use can boost your practice’s efficiency, results and patient satisfaction.

Whether you use the Isolite, Isodry or our new Isovac, our mouthpieces keep the working field as dry as a rubber dam but are easier, faster, safer and more comfortable for the patient. The safety advantages and ease of use will boost your practice’s efficiency, results and patient satisfaction.

Isolite Systems provides three state-of-the-art product solutions: Isolite, illuminated dental isolation system; Isodry, a non-illuminated dental isolation; and the new Isovac, dental isolation adapter.

Using the Isolation Mouthpieces, all three dental isolation products comfortably isolate upper and lower quadrants simultaneously while providing continuous hands-free suction. This allows a positive experience where the patient no longer has the sensation of drowning in saliva/water during a procedure and the practitioner can precisely control the amount of suction/humidity in the patient’s mouth.

Isolite Systems’ dental isolation is recommended for the majority of dental procedures where oral control and dental isolation in the working field is desired. It has been favorably reviewed by leading independent evaluators and is recommended for procedures where good isolation is critical to quality dental outcomes.

Visit the Isolite booth, No. 1455, here at the ADA or go online to www.isolitesystem.com.

By Keystone Industries Staff

With such a wide range of assortments to choose from on the prophy paste market, how are you so sure one paste is the best for you and your patient? Your search can now come to an end with Keystone Industries’ Gelato prophy paste.

Coming in four grits and multiple flavors, this non-splatter, gluten-free formula with 1.23 percent APF and unique cleaning and polishing agents is a sure-fire way to please your hygienists’ needs and any picky patient as well, according to Keystone. Dental Advisor named Gelato its Top Prophy Paste back-to-back in 2013 and 2014, adding to the credibility of this quality product that is essential for every dental professional.

For your convenience, Gelato comes in boxes of 200 individual disposable cups or 6 oz and 12 oz jars. The paste is available in four different grits (fine, medium, coarse and x-coarse) for various stain removal needs. Typically, hygienists use the fine grit for routine use, and the medium grit gives a little more stain removal power. The coarse pastes are required for removing moderate to heavy stains. No matter the job, Gelato Prophy Paste provides exactly what dental professionals need.

Keystone Industries continues to put forward the largest assortment of great-tasting Gelato flavors, such as piña colada and orange sherbet. The paste line also has mint, cherry, bubble gum and raspberry for a plethora of flavor options to satisfy picky clients. The individual cups are clearly labeled for quick retrieval and application.

Ordering couldn’t be easier — go to our website, www.keystoneind.com, and then choose your preferred dealer.

Only one question remains: What are you waiting for?
ZOOM IN
ZOOM OUT

It's time to zoom in and take a closer look at EyeZoom® - the first and only loupes to offer multiple magnification powers. Co-engineered by Orascoptic® and Konica Minolta®, this revolutionary optical design boasts a 3-step variable magnification technology and edge-to-edge high definition resolution.

You now have the power to customize your magnification for specific techniques, or zoom in and out to change your perspective during a procedure. It's like having three loupes in one!

MEET EYEZOOM AT BOOTH 434
orascoptic ™, a leader in vision solutions for dental and medical professionals, introduces eyezoom, the first and only loupe to offer adjustable levels of magnification ranging from 3x–5x.

Developed to assist health-care professionals in viewing an operating site from multiple perspectives, eyezoom conforms to fit the custom preference of each individual. Whether you are an endodontist performing a procedure at 5x or a cosmetic dentist applying a veneer at 3x, the loupe maintains a consistent working distance at each magnification power level.

Co-engineered by orascoptic and Konica Minolta, the patent-pending eyezoom technology provides edge-to-edge clarity and high-definition resolution. Designed for an ideal symmetry between style and performance, the lightweight magnesium bezel adds an esthetically pleasing style to this medical device.

Eyezoom is available on orascoptic’s legend™, rave™, rydon™ and victory™ frames and can be configured as a through-the-lens (ttl) loupe.

About kaVo kerr group

Isolite Systems has revolutionized Isolation Techniques

Now expanded to six patient friendly sizes

Modern Isolation Technique (IT) gives you control of the oral environment so you can do your best dentistry. Our advanced mouthpiece manages the tongue, improves visibility and access, and controls moisture and oral humidity like nothing else. But what makes IT far superior than cotton and the rubber dam is how IT protects the safety of your patients. With isolation this good, you’ll never want to work without IT.
