A new textbook you’ll want to read
AACD luminaries contribute to a text that is useful to everyone, from recent graduates to seasoned clinicians.

Thursday’s meeting, in photos
Did you see the toothbrush that lets you brush from anywhere? Or attend the ‘Killing the Parrot’ session? We did.

A new alliance to benefit you
ChaseHealthAdvance and AACD partner up with a plan to help your patients finance the treatments you recommend.

Enhance smiles, change lives

AACD announces APEX scholarship winners
David Oser and Sarah Post named as recipients

The AACD is proud to announce the first two APEX scholarship award recipients, David Oser and Sarah Post.

Both winners received conference registration to the AACD Scientific Session, air travel, hotel accommodations and an annual membership in the AACD.

Oser is studying dental medicine at Columbia University in New York City and expects to receive his doctor of dental surgery degree in 2012. His work experience includes Epic Systems in Madison, Wis., a laboratory assistant for Dr. Richard Lindroth at the University of Wisconsin–Madison Chemistry and Entomology Laboratory and America Coming Together in

American Academy of Cosmetic Dentistry · May 20, 2011
Official Meeting News · Vol. 1, No. 3

Cosmetic dentistry professionals who want to expand their knowledge and improve upon the standard of care they offer their patients are in the right place this weekend in Boston. The 27th Annual AACD Scientific Session — “The Rise of Collaboration” — is offering an unparalleled selection of courses and new products.

"see Smiles, page 2"
Attendees have plenty of educational opportunities to choose from. Topics of lectures and hands-on workshops range from the latest in bonding techniques to direct resins and composites and everything in between.

On Thursday morning, it was standing room only for “Avoiding and Managing Single and Multiple Tooth Aesthetic Implant Failures,” a lecture presented by Dr. Stephen Chu and Dr. Dennis Tarnow.

“Share Science and Common Shade Taking Errors: Pearls for Your Practice to Increase Predictability” on Thursday morning, one of many heavily attended lectures.

If you are a golfer, you might want to stop by the Aurum Ceramic Dental Laboratories booth (No. 2406). There you can make a donation to A Smile and take a shot to enter and win a $600 tablet.

Dental Savings Club (booth No. 2519) is displaying a wide assortment of diamond and carbide burs, composite instruments and handpieces.

Protech Dental Studio (booth No. 2406) is launching ACE ALL-BOND TE, a universal total-etch bonding agent that is designed to let you prime and bond in one application.

Tokuyama Dental America (booth No. 1814) is one of many labs in attendance.

The Triotray Pro, a reusable, metal, dual-arch tray with the rigidity and accuracy of a full-arch tray, is one of many products available at Triodont Dental Corp. (booth No. 2209).
