Since 1976, OCO Biomedical has raised the bar of excellence within the field of dentistry by producing state-of-the-art, user-friendly dental implant solutions. Today, we continue to manufacture superior dental implants and attachment systems. We are dedicated to meeting the ever-evolving needs of our customers and continue to deliver innovative products while supplying only the best customer care.

OCO Biomedical, formerly known as the “O” Company, revolutionized the over-denture stabilization market when we introduced our patented O-Ball/O-Ring attachment system for removable prosthesis in 1980. Throughout the 1990s, OCO worked diligently with the dental implant community to produce subsequent generations of innovative dental implants that met the needs of dental implant practitioners around the world.

In 2003, we were the first company to develop a one-piece, full-size implant: the ISI. Presently, we are the only company to manufacture immediate load implants that result in osseous fixation when placed by way of our patented Bull Nose Auger® Tip and Embedded Tapered Platform™ at the top of the implant.

OCO is proud to deliver an implant product line that is designed specifically to increase procedural and functional performance and enhance overall implant success rates. Designed for selective loading (either immediate or conventional (delayed) loading), OCO Biomedical’s Dual Stabilization® Dental Implant System is simple and minimally invasive. It can be used for simple implant procedures but is versatile enough to address even the most complicated of cases. Because our system is so flexible with easy restorative options, it meets the needs of general practitioners and specialists alike.

OCO Biomedical aims to be the worldwide market leader in dental implantology by creating and supplying the most innovative, effective and user-friendly dental implant products. Additionally, we offer dentists a valuable educational experience through our dental implant training seminars and always guarantee superior customer service and technical support.

Core I: Advanced Functional Dentistry
The Power of Physiologic Based Dentistry
The Future of Dentistry Awaits You

The LVI Core I program encompasses the principles in physiologic restorative concepts creating excellence in care for your patients and prosperity for you. This program will start you on a path to greater understanding and enjoyment of our profession while creating loyal, enthusiastic and grateful patients!

This exciting three-day, hands-on program shows you how to evaluate cases and educate your patients for advanced restorative dentistry and more comprehensive case acceptance. For many of your patients you will learn how to eliminate a lifetime of pain that no other medical professional has been able to address, and for some learn how you can actually save their lives!

In essence, become a mouth doctor with ability to do things you never were taught in dental school. You have patients in your practice RIGHT NOW that can benefit from these concepts and you have the opportunity to change their lives starting the day you return to your office.

Dr. Bill Dickerson, Dr. Heidi Dickerson and Dr. Mark Duncan will present this information in a practical, easy to understand manner where you will feel comfortable presenting these exciting and practice building new options to your patients on Monday. Don’t miss this golden opportunity to find out about this incredible world of dentistry that awaits you!

Core I guarantee: We are so sure you will be satisfied with this course that we offer a money back guarantee!

“LVI has given me a new driving force in my career. It has recharged my enthusiasm for dentistry and made me realize that my career choice was not a mistake.”
—Dr. Charles G. Small, SSD, DDS, MD
“I wish I would have attended LVI earlier in my career. I still have time to make a difference but this info is too valuable to not be used throughout an entire dental career.”
—Dr. Tom Schwendeman, Hinsdale, IL
“Not only did I learn what I didn’t know about dentistry, I learned how to help my own long history of pain in the head and neck. Thanks for the missing link.”
—Dr. Paul Bell, Denver, CO
