By KaVo Kerr Group

KaVo Kerr Group brings together some of the most dynamic brands in dentistry. Connected by a common DNA of trust, experience, choices, quality and smart innovation, product launches from KaVo Kerr Group are intended to help dental professionals optimize their work and lives.

Product launches at this year’s CDA Presents The Art and Science of Dentistry are designed to do just that. Kerr’s Demi Ultra curing light features revolutionary U-40 Ultracapacitor Technology that re-energizes the unit to full power in less than 40 seconds. This creates a major shift in the convenience, efficiency and reliability dental professionals can expect from their curing light. DEXIS CariVu™ is a compact, port-
able caries detection device that uses patented transillumination technology to support the identification of occlusal, interproximal and recurrent carious lesions and cracks. Orascoptic’s Nano HD loupes deliver detailed imagery and generous field size in a miniature, lightweight and comfortable footprint. Its proprietary optical lens design and lens coatings provide enhanced visual acuity to improve patient care, procedural outcomes and clinician health.

Pelton & Crane’s Spirit 3000 dental chair featuring the “Narrow Back Advantage™” is designed to help mitigate the leading factors contributing to musculoskeletal disorders. The narrower chair back (11.5 inches at the shoulders and 15 inches at the midline) allow better access to the oral cavity for the clinical team, while keeping patients of all sizes comfortably supported.

The ElementsFree cord-free obturation unit from Axis | SybronEndo is specifically designed for use with the Continuous Wave of Condensation technique. It includes a downpack device that instantaneously controls the heating of the heat pluger for a single-motion downpack obturation, as well as an ergonomic backfill device with a motorized extruder system that precisely controls the flow of heated gutta-percha or other material used to backfill a canal.

“We don’t just launch, we lead,” said Matt Garrett, vice president of marketing for KaVo Kerr Group. “These most recent product launches represent game-changing developments in their categories, meaningful changes that will directly impact the day-to-day success of dental professionals.”

KaVo Kerr Group is a $2 billion global portfolio of dental brands, including KaVo, Kerr, Kerr Total Care, Pentron, Axis | SybronEndo, Orascoptic, Pelton & Crane, Marus, Gendex, DEXIS, Instrumentarium, Soredex, i-CAT, NOMAD, Implant Direct and Ormco. Visit www.kavokerrgroup.com for more information.
