Pick up something new

By Sierra Rendon, today Staff

More than 14,000 dentists, dental professionals and students have traveled from all across the United States to take part in the wide array of opportunities here at the CDA Presents The Art and Science of Dentistry in San Francisco.

From the 375 exhibiting booths with enticing new products to the more than 200 educational courses and sessions available, attendees are sure to keep quite busy today and Saturday at the show.

Dentists and dental students who came planning to purchase new products that will make things smoother and easier in the office have a lot to choose from. Here is just a sampling of the exciting activities and cutting-edge technology you can find in the filled-to-the-brim exhibit hall:

- A ‘perfect FIT’: Wouldn’t you like to learn more about an open CAD/CAM system that is fully integrated for chairside dentistry? Planmeca’s new FIT CAD/CAM system offers restora-

Upcoming educational highlights include:

- “Expanding Dental Practices using Telehealth Connected Teams and Virtual Dental Homes,” 2:30 to 5 p.m. today. In this course, Dr Paul Glassman will assist dentists who wish to use telehealth-connected dental teams to extend dental care to underserved populations in their communities.

- “Making Rotary Endodontics Highly Predictable, Safe and Easy,” 8 to 11 a.m. Saturday. Hosted by Dr. John West, this workshop will teach attendees how to master the three skills of “finding,” “following” and “finishing” canals, using the most predictable, safest and most efficient techniques and technologies in the world today.

For more information, check out the daily course schedule in your CDA guide or on the app.

Relieve Hypersensitivity & Reduce Caries Risk

Visit www.shofu.com or call 800.827.4638
Shofu Dental Corporation • San Marcos, CA
tions that are individually crafted to fit your unique needs. To learn more, visit booth No. 2026.

- **Flash from the past:** If you happen to see a couple walking through the hall who look as if they belong in a different era, do not be alarmed! (They aren't ghosts.) The couple is simply a visual to go along with the motto, ‘Don’t sink below the surface! Stay supra-gingival!’ To find out exactly what this means, visit the L.A. Institute of Clinical Dentistry and Ruiz Dental Seminars booth, No. 632.

- **Say goodbye to dry skin:** Do you suffer from eczema, poor circulation, rashes, hives, impetigo or any other skin disorder? If so, you may want to stop by the Hawaiian Moon booth, No. 526. This lotion is made with 100 percent organic aloe and is super popular among health professionals who have to wash their hands several times a day.

- **Digital camera for dentistry:** Do you need a new digital camera for your practice? If so, be sure to stop by Shofu, booth No. 1621, to check out the EyeSpecial C-II, a smart digital camera designed exclusively for dentistry.

- **Heat – anytime, anywhere:** Reusable Heat, booth No. 528, is new to the CDA San Francisco show. The company’s heat packs are instant, portable and reusable. Visit the booth to hear all about show specials.

- **Live implant surgery events:** Be sure to check out Hiossen Implants, booth No. 640, if you are interested in learning more about upcoming dental implant courses in which you (the attendee) place the implant.
Scenes from Thursday

Practice Development Manager Bhimerjeet Kahlom talks to attendees at the CareCredit booth (No. 801) about its popular show promotion featuring a Winnie the Pooh pillow pet.

Stop by the Army recruiting booth, No. 2409, to see how they can help you be all you can be.

‘Don’t sink below the surface, stay supra-gingival’ with the L.A. Institute and Ruiz Dental Seminars. To learn more, stop by booth No. 632.

Carrington College dental students enjoy checking out the many aisles in the CDA exhibit hall Thursday morning.

Attendees stop by to talk to Chuck Ferrara of Parkell at booth No. 2301.

Shofu's Meredith Murphy helps an attendee check out new products at the booth, No. 1621.

Stop by the Patterson booth, No. 1026, to make a purchase and play a round of Advantage Mini Golf, which might win you some cash!

Samantha Merrick and Anita Duran of OCO Biomedical stand ready to help at the company’s booth, No. 1242. (Photo/Humberto Estrada, today Staff)

Visit Planmeca CAD/CAM booth, No. 2026, and Gavin Seernberg, district manager, and Heather Hennen Dall, CDD, can introduce you to all the benefits of the new Planmeca FIT.
Experience the advantages of Hahn™ Implants

“The Hahn™ Tapered Implant System offers practitioners some distinct advantages: an easy-to-use surgical kit with length-specific drills, a thread pattern that engages the bone precisely as directed with a high degree of initial stability, and esthetic healing and restorative components for a natural emergence profile. Add to this the support of an industry-leading laboratory, and you won’t find a more complete implant system anywhere on the market.”

– Timothy Kosinski, DDS, MAGD; Bingham Farms, Michigan

“The simplified surgical protocol of the Hahn Tapered Implant System has helped me boost my case efficiency, with the wide-ranging assortment facilitating predictable placement in all regions of the mouth. The implant performs exceptionally well in fresh extraction sites. Anyone looking to confront the challenges of implant therapy will appreciate the versatility and performance of this exciting new system.”

– Paresh Patel, DDS; Mooresville, North Carolina

$100* per implant with special offer
$160* per implant list price

Already have a NobelReplace® surgical kit? Use your existing kit and order five Hahn Tapered Implants for just $500 ($300 savings). This offer also includes a set of four FREE Hahn Tapered Implant drivers ($200 value).

IMMEDIATE LOADING

Achieve a high degree of primary stability and facilitate nonfunctional provisionalization where indicated.

LIMITED SPACE

Robust 3 mm implant allows for restoration of narrow ridges and tight interproximal spaces.

MOLAR EXTRACTIONS

Wide-diameter implant ideally suited for “titanium grafting” of posterior extraction sites.

The DocPort i.o. intraoral camera features a focus-free design for ease of use and crystal clear imaging. Image acquisition is hassle-free via the easy-touch capture button located on the camera wand, or with optional USB footswitch. Direct computer connection using a standard inexpensive USB cable eliminates costly cable repairs and the camera is supplied with a remote automatic on/off handpiece holder. Easy integration with any dental software platform in both PC and Macintosh environments makes DocPort i.o. the natural choice for quality dental imaging.

James Rosenwald, DDS, FAGD
“I recently bought two DocPort cameras (to replace my older units) and found them so easy to use and so valuable to my practice that I have purchased three more units. I highly recommend this camera.”

Gerald Ross DDS—Tottenham, ON
“I’ve had cameras costing more than double, but my staff prefers the DocPort over any other because the pictures show incredible detail and it’s so easy to use. We’ve tried a lot of them, but this camera is amazing.”

The Hahn Tapered Implant: 45 years in the making

By Keith Peters, Contributing Editor, Inclusive magazine

Since placing his first implant nearly 45 years ago, Dr. Jack Hahn has spent much of his career as an implantologist thinking of ways to make treatment more accessible to the practitioner as well as the patient.

Implant design has improved dramatically during that time, with Hahn spearheading key innovations that have helped make implant therapy the essential mode of dental treatment it is today. From the endosseous blade-form implant he helped Miter Inc. develop in 1978 to the newly released Hahn™ Tapered Implant, Hahn’s efforts have been driven by the desire to continually improve in order to make treatment simpler and more predictable.

“The easier we make it to position the implant for a restoration that looks like a natural tooth, the better results we’ll have,” Hahn said in a recent interview.

It was this line of thinking that inspired Hahn’s idea for the first tapered implant. After a long day that included several cases in which he had difficulty placing parallel-walled implants in the anatomically restricted space of the anterior maxilla, Hahn had an epiphany: “The tooth I was replacing was taper-shaped, so why was I putting in a square peg?” That very night, he sketched out the concept.

Steve Hurson, former chief scientist for Nobel Biocare, has said of this industry-changing innovation: “Dr. Hahn identified a need for an implant with a narrower apex, which would achieve higher primary stability in soft bone. The concept was to have an implant design that would have the tapered shape of a tooth root—resulting in a system with outstanding predictability.”

In essence, this was an extension of the philosophy that inspired the design of the machined collar Hahn helped Steri-Oss develop. “By designing a 4 mm machined collar that was more like the neck of a natural tooth root, we were able to prevent crestal bone loss and improve outcomes,” Hahn said.

This drive to constantly improve has not always been open arms. In fact, his role with Steri-Oss was borne of a disagreement with Miter Inc.

“The Titanodont implant had some problems, including an abutment attachment that lost its retention after a few years and fins that would become exposed if there was any crestal bone loss. So I proposed a machined collar with a new prosthetic connection,” Hahn said. “They said they couldn’t do it because it would be too expensive to change the machinery. I didn’t want to have my name associated with the implant any longer if they weren’t going to correct the problems.”

This led Hahn to other endeavors, including his role with Steri-Oss and, eventually, Nobel Biocare.

After the NobelReplace™ tapered implant system launched in 1997, Hahn continued placing and restoring implants, completing thousands of cases. This experience afforded clinical observations that would serve as the basis for a new implant design that Hahn considers his best.

“I came to Nobel with my idea for a new implant in 2012, conceptual engineering drawings in hand, and they said, ‘Replace is so successful; why change now?’”

Hahn said he replied: “Apple has become one of the most successful companies in history by constantly innovating. Why shouldn’t we do the same in dental implants?”

Hahn continued, “I had been placing implants for decades, and there were still problems we could solve with a new design. I had this implant that would be easier for doctors to place, with a simpler drilling protocol and a thread design that would allow for efficient placement and a high degree of primary stability.”

Wanting to take his design concept to the next level, Hahn began pursuing alternatives, an effort that eventually led him to Glidewell Laboratories.

“I knew a lot of the Glidewell people from my days at Steri-Oss and Nobel, and they were happy to meet with me,” he said.

The resulting partnership culminated in the recent launch of the Hahn Tapered Implant System, and Hahn said he couldn’t be happier with the results.

“When I first visited their facilities, it was immediately apparent that their manufacturing capabilities are state-of-the-art,” he said. “Their engineering team has the technology and knowledge to bring design concepts to life with astonishing speed and precision, and their expertise on the prosthetic side of implant dentistry has been invaluable in creating an implant that is as simple to restore as it is to place.”

With a career that speaks volumes of Dr. Jack Hahn’s 45 year career as an innovator and implantologist, (Photos/Provided by Glidewell Laboratories)

Editor’s note: The Hahn Tapered Implant is a registered trademark of Glidewell Laboratories. NobelReplace is a registered trademark of Nobel Biocare.
“Getting my restoration done in a day? That’s music to my schedule.”

Better-looking and fitting restorations in a single visit.

With the Planmeca FIT™ CAD/CAM restorative system, you can now do quality restorations chairside with the speed, accuracy and intuitive design that you will appreciate. Saving time and delivering a better patient experience.

PRG Barrier Coat is a light-cured giomer varnish designed to provide immediate and prolonged relief to patients experiencing severe dental hypersensitivity. Indicated for a variety of applications, PRG Barrier Coat is made for patients suffering from severe gum recession, newly erupted molars or decalcified enamel.

This bioactive desensitizer incorporates Shofu's proprietary giomer technology, in which a unique arrangement of glass ionomer and six beneficial ions — fluoride, sodium, strontium, aluminum, silicate and borate — form a protective coat, lasting several months. The giomer barrier neutralizes acids, inhibits plaque build-up and releases and recharges fluoride.

PRG Barrier Coat is self-adhesive, with no separate etching or bonding steps required. Only an ultra-thin surface layer, ca. 15 µm, is needed to provide prolonged hypersensitivity relief. Containing no alcohol, acetone or hema, PRG Barrier Coat is safe to use adjacent to soft tissue.

Orthodontists are encouraged to daub PRG Barrier Coat around orthodontic brackets and other hard-to-brush areas to activate instant protection from acids, plaque and to help reduce the formation of white spots.

This unique Giomer desensitizer is a two-part system inclusive of a base and activator that are mixed together. Apply a thin layer of the mixture, and then leave it undisturbed for more than three seconds. Light cure for 10 seconds.

Available from an authorized local dealer at a retail price of $36.65, a PRG Barrier Coat mini-kit includes a 0.9 mL syringe of an active ingredient, eight unit-dose containers of a giomer base ingredient and accessories.

For more information on PRG Barrier Coat or to place an order, visit www.shofu.com or call (800) 827-4638.
NEW! Visalys® Core – Secure core build-up for high stability.

Visalys® Core is a fluoride-containing, dual-curing composite, developed for the fabrication of radiopaque core build-ups and core fillings and for cementing root posts. The product incorporates Active-Connect-Technology (ACT), which is unique in the market. This enables the material to bond actively with common light-curing and dual-curing, single-step and multi-step adhesives, without an additional activator. The advantage for users is that it allows them to use the bonding agent they are used to – no matter whether it is a light-curing or dual-curing, a single- or multi-bottle system. Call 877-532-2123 direct to place an order.

SharperPractice: The Bat Cave of dentistry

By SharperPractice Staff

SharperPractice specializes in distributing innovative products from around the globe that are “Best in Class.” For more than 20 years, the company has been in the business of providing the most advanced intraoral camera solutions in the industry — as well as innovations that increase efficiency for the dental office.

Some dentists who have visited the SharperPractice booth in dental meeting exhibit hall refer to it as the “Bat Cave” because they are amazed at the quality and innovation in the products presented.

The company’s flagship product, the DocPort i.o. intraoral camera, features a fog-free, focus-free design for ease of use and crystal-clear imaging. Image acquisition is hassle-free via the easy-touch capture button located on the camera wand or with the optional USB footswitch.

Direct connection to USB ports using a standard, inexpensive USB cable eliminates potentially costly cable repairs, and the camera is supplied with a remote automatic on/off handpiece holder.

Designed to integrate directly with any dental software platform in both PC and Macintosh environments, DocPort i.o. is an easy choice for quality dental imaging.

New from Carl Zeiss —

• As many as 75 percent of adult patients experience some degree of anxiety when visiting the dentist. Tackling patient anxiety is not always a simple solution for a dental practice. One of the most effective and natural ways of putting them at ease is through distraction, which can take the mind’s attention away from the sights and sounds of the dental office to a more calm and peaceful place.

Thanks to the Cinemizer OLED, your patients can experience high-quality 2-D or 3-D videos during almost any procedure in a comfortable, convenient and immersive environment. This will help them relax and forget where they are, decreasing anxiety and stress and improving their overall experience in your office.

• SockIt! is the first and only wound dressing specifically designed for oral use. It’s as simple as performing the procedure as you normally would, then applying SockIt! chairside and sending the remainder home with the patient. You can use it after any procedure, and it does not replace anything else in your office. Stop by the SharperPractice booth to sign up for a free product evaluation.

• FlashMax P3, one of the most powerful curing lights in the world, has a wide-spectrum output of more than 5,800 mw/cm² and cures 3 mm layers of most materials in only two seconds. Manufactured in Denmark, the FlashMax P3 features a unique ergonomic design with simple identical bilateral controls in a cordless form factor. Replaceable smart-charge battery technology allows the light to charge throughout the day on its 360-degree base and activates 200 cures on a single charge. It contains nearly three times the power of plasma arc lights at a fraction of the cost.

• The EverClear mirror is a must for every dental office. This is the mirror you never have to wipe. Gone are the days of constantly wiping handpiece spray and debris from a dental mirror. Gone are worries about the assistant’s air spray keeping the mirror clean. No longer will dentists twist their backs and necks to get a direct view of the tooth, when a spray-covered mirror stops serving its purpose.

Only the best-in-class products and services become SharperPractice offerings, according to the company. For more information, you can visit www.sharperpractice.com or stop by the booth, No. 726, here in San Francisco.

The Cinemizer OLED virtual reality video glasses from Carl Zeiss. (Photos/Provided by SharperPractice)

The I-DENT EverClear mirror, right, never needs to be wiped clear of handpiece spray and other debris (as opposed to a regular mirror, left), ensuring constant unobstructed views of your work zone.
INTRODUCING

NEW! UNIT DOSE CAPSULES

More convenient dispensing and helps promotes asepsis.

- Stops gingival bleeding and seepage that may interfere with impression taking.
- Fast-acting.
- Light green color makes the material easy to detect.
- Fraction of the cost of other retraction materials.
- Great for tissue management when seating restorations, placing rubber dam clamps (controlling bleeding), bleaching teeth (to manage moisture) and restoring subgingival cavities.
- NEW Unit Dose Capsules allow for even more convenient dispensing. Plus, they promote asepsis!

CREATE A DRY WORKING ENVIRONMENT EVERY TIME.

Dryz™ is terrific for use alone or in conjunction with retraction cord or compression caps. Dryz is fast-acting in stopping gingival bleeding and seepage from crevicular fluid that may interfere with impression taking.

The light green color of Dryz contrasts nicely with gingiva, blood and tooth structure, making it easy to detect where the material has been placed. Dryz is quickly removed with an air/water syringe and leaves no residue to interfere with impressions or seating of restorations.

USING DRYZ IS A BREEZE!

Prior to taking your impression, rinse and dry the prep. Isolate the area and simply syringe Dryz into the sulcus directly from the syringe (we don’t make you purchase a special dispensing gun to extrude the material). Dryz will create a nice space between the gingival tissue and tooth surfaces while controlling any bleeding with its aluminum chloride content.

Dryz is also great for tissue management when you’re seating permanent crowns or bridges, placing rubber dam clamps, bleaching teeth and restoring subgingival cavities. It controls seepage that may contaminate a sensitive, restorative material, allowing you to do optimal restorative dentistry.

TRY IT RISK-FREE TODAY!

- **NEW!** Dryz™ Unit Dose Capsules ($183) $56.00
  Includes 30 unit dose capsules (0.24 g/Capsule). Capsules fit most Centrix™ dispenser guns (required/not included).
- **Dryz™** Gingival Hemostatic Retraction Paste
  - Standard Kit ($180) $52.00
    Includes 7 syringes and 15 applicator tips.
  - **Dryz™** Value Pack ($182) $106.00
    Includes 25 syringes and 55 applicator tips. **SAVE ALMOST A DOLLAR PER SYRINGE** with the Value Pack!
- **Dryz™** Luer Lock Applicator Tips, 40 pieces ($381) $20.00

One prophy paste for every need

By Keystone Industries Staff

- Dental professionals can spend copious amounts of time searching for a prophy paste that does it all.
- A paste considered to be ideal would be one that works well for the dentist, does its job in patients' mouths and enables patients to leave the office with a good taste.
- With Gelato prophy paste by Keystone Industries, the possibilities have no limits, according to the company. The paste, which provides a smooth, splatter-free application, is 1.23 percent fluoride ion and will leave a patient's teeth with excellent polish—and stains removed. Minimal enamel loss is met with each use.

Review: 'Top Prophy Paste'

One of the biggest bragging rights Gelato prophy paste has earned is from The Dental Advisor. For two consecutive years (2013 and 2014), Keystone's paste won Top Prophy Paste. In the review, based on more than 2,500 uses with 35 consultants, it earned a 4.5 grade out of 5 and a 91 percent clinical rating.

The ranking would appear to confirm how the paste gets the clinical job done and also provides patients with the flavor options to leave their mouths feeling fresh and clean.

Coming in four different grits (fine, medium, coarse and x-coarse), Gelato has a wide range of uses for removing stains. Dental hygienists normally use the fine grit for routine work and move their way up the grit scale for heavier stain removals.

A flavor for every taste

Keystone's Gelato comes in six flavors: bubble gum, cherry, mint, piña colada, orange sherbert and raspberry. The paste is available in 6- and 12-ounce jars, and also boxes of 200 individual cups.

To order, visit Keystone Industries online at www.keystoneind.com/en/home.

Here at the CDA

To order the Gelato prophy paste, visit Keystone Industries online at www.keystoneind.com/en/home.
Another first in dental isolation.

Surgical dental procedures are now even easier.

Using Isolite’s Sterile Mouthpiece you have control over blood and debris like never before allowing you to focus on dentistry and worry less about everything else.

Available in a full range of sizes to best fit every patient.

Individually packaged in thermoform trays with a Tyvek lid and supplied in convenient operatory boxes of 3.

AT CDA-F TO RECEIVE A

SPECIAL OFFER

Better Isolation = Better Dentistry®
For the ninth consecutive year, CareCredit has donated $100,000 to the ADA Foundation (ADAF) Give Kids A Smile (GKAS) Fund. The $100,000 grant is designated to support Give Kids A Smile through funding of three major initiatives:

• GKAS NASCAR elementary school oral health education events for underserved children.
• ADA Mission of Mercy and Give Kids A Smile oral health education and treatment event.
• GKAS and TeamSmile collaborative oral health treatment events, teaming sports and dental professionals to improve children’s oral health.

Building off the success of previous years, children from underserved communities will participate in GKAS NASCAR oral health education events to be held in Indiana, South Carolina, North Carolina and Alabama from now through October. These education events will incorporate key messaging from the Ad Council’s 2min2x oral-care campaign, educating and encouraging children to spend two minutes brushing their teeth, twice a day. As in past years, each child attending the event will receive free oral-health goody bags.

The grant will also support the ADA Mission of Mercy, a one-day free oral health-care event to be held in conjunction with the ADA – America’s Dental Meeting in Washington, D.C., on Nov. 8. During the event, dentists and dental team members will volunteer their services in the Give Kids A Smile area to provide up to 200 underserved children with education, screenings, cleanings, sealants, fluoride treatments and needed restorative care.

In the fall, the CareCredit donation will also fund several GKAS and TeamSmile collaborative events to be held in conjunction with professional sports teams.

“Teaming up with the ADA Foundation’s Give Kids A Smile program enables us to deliver a message about good oral health to thousands of parents and children this year,” said Cindy Hearn, senior vice president branding and communications for CareCredit, member of the ADA Foundation Board and GKAS National Advisory Committee. “As the founding donor of the ADA Foundation GKAS Fund, we are pleased that our grant will, once again, be used to further support these exciting programs and can, in a unique and relevant way, improve the lives of children who have little to no access to necessary dental care.”

For more information about the GKAS events, visit facebook.com/GiveKidsASmile or follow GKAS on Twitter @GiveKidsASmile.
PLANMECA
ProMax® 3D Family

Versatile 2D/3D Imaging Technology

Exclusive CBCT Ultra-Low Dose imaging protocol reduces patient radiation by an average of 77% when compared with standard imaging protocols without loss of diagnostic quality*

- Patented SCARA technology, allowing limitless imaging possibilities
- Offers optional ProFace 3D facial photos for advanced case presentation, operation pre-planning, and treatment follow-up
- Selectable volume sizes and pediatric mode for 35% lower dose
- Optional digital impression and cast model scanning available for ProMax 3D, 3D Plus, 3D Mid, and 3D Max
- Upgradable all-in-one technology
- Open-architecture Planmeca Romexis software included
- Mac and PC compatible

By Planmeca Staff

Planmeca Sovereign
The Planmeca Sovereign is a combination of sophisticated engineering, innovative technology and award-winning design. It is the only dental unit on the market with both a motorized chair swivel and a motorized base for ease-of-use for any treatment need — such as CAD/CAM, implantology, laser treatment, prosthodontics or even anesthesia, all in the same room.

In addition, the length of the motorized backrest can be adjusted to optimally position patients of all sizes. Available only on the Planmeca Sovereign, this innovative feature guarantees the best possible comfort for the patient and optimal working ergonomics for the dental team.

Planmeca Sovereign Classic
The Planmeca Sovereign Classic was designed around the key concepts of comfort and usability. A slim, compact cuspidor makes it the perfect choice for any treatment room, while the user-centered design offers ease of use for both doctor and assistant.

Ultraleather™ upholstery and ergonomic design also ensure patient comfort during procedures. The unit is fully customizable, providing options for personalized settings from its user-friendly touchscreen. A six-position instrument console allows easy access to preferred instruments, while the Flexy™ holder for suction tubes and additional instruments supports the treatment needs of any practice.

Planmeca Compact i Touch
Planmeca Compact i Touch supports an ergonomic and smooth workflow, with simple and intuitive details that make your everyday work easy, comfortable and efficient — without compromise.

For versatility, its compact size fits almost any office design, plus it’s packed with features and functionalities to maximize your productivity.

With more than 40,000 satisfied users around the world, it is designed to accommodate a wide variety of needs in dentistry.
When people need treatment now, they also need options now.

The CareCredit credit card is a payment option that lets your patients choose the care that’s best for them and helps them get started now—without delay.*

* Subject to credit approval.
PRACTICE GROWTH. PATIENT LOYALTY. ALL SMILES.
