Here at CDA Presents the Art and Science of Dentistry, there are plenty of educational opportunities, ranging from lectures and hands-on workshops to impromptu demonstrations on the show floor.

Of particular note this year is an international symposia of dental learning featuring Dr. Takashi Watanabe and Dr. Kiyokaku Minami lecturing on how restorative dentistry is practiced in Japan. The courses offer information on alternative philosophy and treatment modalities, as well as cultural nuances in the delivery of dental care.

Watanabe offered his presentation on Thursday, and Minami will speak tomorrow from 9 to 11:30 a.m. and again from 1 to 3:30 p.m.

Another highlight is a panel discussion, “Critical Questions That Lead to Critical Decisions in Your Practice,” led by Dr. Frank T. Curry. The session is today from 1 to 4 p.m.

Check your meeting guide for locations and for additional educational options.
As if the original NOMAD handheld X-ray device wasn’t cool enough, along comes the NOMAD Pro 2. Mike Heyn of Aribex (booth No. 2534)
