Scientific programme of the 2014 annual scientific congress of the European Association of Osseointegration

Thursday, 25 September

12:45–13:00  Welcome Address

13:00–14:30  Surgical alternatives
- Flapless surgery
- Tissuebank
- Implant insertion after tooth extraction
- Long-term outcome of implant restorations in the aesthetic zone

15:00–16:30  Oral communication – Treatment of technical and biological complications

Friday, 26 September

08:45–10:15  Oral communication – Basic research

Implantologists of tomorrow
- Reduced n. and dimension of implants
- Augmentation prior to implant placement
- Reduced length implants
- Reduced number of implants

Extracting teeth in modern dentistry: Change in paradigm?
- What happens after tooth extraction and what do we need to know?
- Why do we not like to perform Alveolar ridge preservation and why let it heal spontaneously?
- Why I like to perform Alveolar ridge preservation?
- Expert discussion

Oral communication – Clinical research – Surgically related

10:15–10:30  Congress Ceremony

10:45–12:15  Prosthetic alternatives
- All ceramic restorations or low precious alloys
- CAD cam technology where are we?
- Complications of FDPs how do we prevent?
- General Assembly

13:15–14:45  Oral communication – Prosthetically oriented (part 1)

Implantologists of tomorrow - When do we need to submerge?
- Influence of hardware and insertion protocol on hard and soft tissue healing
- Advantages of submerged approach in the aesthetic zone
- Indications and limitations to the non-submerged approach

Full arch restorations: several options or only one protocol?
- How many implants for a fixed restoration?
- Treatment planning for the reconstruction of the atrophic maxilla

15:15–16:45  Evaluation of aesthetics and functional long term results
- Objective evaluation of aesthetic outcome: different methods
- Is stable long term aesthetic outcome achievable?
- Could we reduce biologic long term complications of implant supported restorations?
- A comparison of smooth and micro-rough titanium surface: are we on the right track?

Practice management session
- Economical and demographic situtation in European dentistry
- Current indications to resorbable and non resorbable membranes in GBR
- The management vision: Total success in dentistry
- Efficient communication within the team and with the patient for the ideal treatment outcome

Saturday, 27 September

08:00–10:45  Oral communication – Prosthetic reconstruction of the Atrophic maxilla

10:45–12:15  Oral communication – Clinical research – Prosthetically oriented (part 2)

13:15–15:15  Oral communication – Poster Presentations

Bone augmentation dilemmas
- Prosthetic compensation to avoid augmentation procedures
- When do we need autogenous bone
- Current indications to resorbable and non resorbable membranes in GBR

13:00–13:15  Award Ceremony

13:15–15:15  Soft tissue recessions around implants: Prevention and treatment
- Risk indicators and prevention of mucosal recessions
- Surgical treatment of mucosal recessions at implants
- Prosthetic compensation of mucosal recessions at implants
- Management of soft tissue recessions at peri-implantitis sites

15:15–15:20  Closing Ceremony
