Scientific programme of the 2014 annual scientific congress of the European Association of Osseointegration

Friday, 26 September

08:45–10:15
Oral communication – Basic research

Implantologists of tomorrow – Reduced n. and dimension of implants
- Augmentation prior to implant placement
  Fouad Khouri
- Reduced diameter implants
  Bilal Al Nawas
- Reduced length implants
  Daniel Thoma
- Reduced number of implants
  Bjarni Pjetrusson

Extracting teeth in modern dentistry: Change in paradigm?
- What happens after tooth extraction and what do I need to know?
  Daniela Battelli
- Why do I not like to perform Alveolar ridge preservation and why do I let it heal spontaneously?
  Stefan Fickl
- Why I like to perform Alveolar ridge preservation?
  Fabio Vignoletti
- Expert discussion

Oral communication – Clinical research - Surgically related

10:15–10:30
Congress Ceremony

10:45–12:15
Prosthetic alternatives
- All ceramic restorations or low precious alloys
  Christoph Hämmerle
- What overdenture type?
  Joelynne Feine
- CAD cam technology where are we?
  Joerg Strub
- Complications of FDPs how do we prevent?
  Dean Mornin

12:15–13:15
General Assembly

13:15–14:45
Oral communication – Prosthodontically oriented (part 1)

Implantologists of tomorrow – When do we need to submerge?
- Influence of hardware and insertion protocol on hard and soft tissue healing
  Ryo Jimbo
- Advantages of submerged approach in the aesthetic zone
  Jan Cosyn
- Indications and limitations of the non-submerged approach
  Robert Haase

Full arch restorations: several options or only one protocol?
- How many implants for a fixed restoration?
  Luca Francetti
- Treatment planning for the reconstruction of the edentulous maxilla
  Matteo Chiapasco
- Individualized prosthetic solution for each edentulous patient
  Germain Gallucci
- Rational prosthetic options for the edentulous case
  Nizar Bichacho
- Quality of life aspect
  Pernilla Larson Gran

Oral communication – Basic research

13:15–16:45
Korean Session

Korean Session

Opening remarks

Smart dental implant placement
- Upgrade of Computer Guided Flapless Implant Surgery
  B.H. Choi
- Smart implant placement & Computer guided dentistry
  R. Leesunbok

Novel approaches for alveolar bone regeneration
- Tooth-derived bone graft material
  Demineralized dentin matrix
  T.K. Kim
- Recent advances in application of rhBMP-2 for bone regeneration
  E.W. Jung

Towards natural beauty in implant prosthodontics
- Long term study of alumina touched zirconia abutments in implant restorations
  J.S. Han
- Esthetic approaches to various ridges in anterior maxilla
  J.S. Lee

Comprehensive management of complications following dental implant
- Innovative solution devices for various implant complications
  J.Y. Kim
- Back to basics: Surgical intervention for Periimplantitis
  B.D. Ham

15:00–16:30
Oral communication – Clinical research – Prosthodontically oriented (part 2)

Closing remarks

15:15–16:45
Evaluation of aesthetics and functional long term results
- Objective evaluation of aesthetic outcome: different methods
  Rudolf Farhauer
- Is stable long term aesthetic outcome achievable?
  Urs Reiber
- Could we reduce biologic long term complications of implant supported restorations?
  Anne Marie Boysen-Jannaker
- A comparison of smooth and micro rough titanium surface: are we on the right track? 
  Maurizio Tonetti

Practice management session
- Economical and demographic situation in European dentistry
  Juan Carlos Llinder
- Leadership and productive teams in dentistry
  Elizabeth Kalenderian

10:15–12:15
Basic research

12:15–15:15
Poster Presentations

Bone augmentation dilemmas
- Prosthetic compensation to avoid augmentation procedures
  Eric Van Dooren
- When do we need autogenous bone
  Andreas Stavrakou
- Current indications to resorbable and non resorbable membranes in GBR
  Maria Becetti
- Vertical ridge augmentation: limits and indications and long term results
  Franck Renouard, Massimo Simon

What do we need for our patients?
- When do we need implants and what are the health and social implications?
  Alberto Fonzar
- Cost benefit of tooth replacement
  Hugo De Bruyn
- Implants in the elderly population with reduced financial income
  Frauke Müller

Saturday, 27 September

08:00–10:45
Oral communication – Surgical indications and long term complications of implant prosthodontics
- How to prevent implant aesthetic failures
  Matteo Capelli

08:45–10:15
Reducing treatment time: Is it always a must?
- Tiziano Testori, Paolo Casentini, Denis Tarrow

Oral communication – Foster Presentations

Bone augmentation dilemmas
- Prosthetic compensation to avoid augmentation procedures
  Eric Van Dooren
- When do we need autogenous bone
  Andreas Stavrakou
- Current indications to resorbable and non resorbable membranes in GBR
  Maria Becetti
- Vertical ridge augmentation: limits and indications and long term results
  Franck Renouard, Massimo Simon

What do we need for our patients?
- When do we need implants and what are the health and social implications?
  Alberto Fonzar
- Cost benefit of tooth replacement
  Hugo De Bruyn
- Implants in the elderly population with reduced financial income
  Frauke Müller

15:15–16:15
Esthetic and functional rehabilitation of the periodontally compromised tooth/dentition: the contribution of periodontal tissue engineering and biomimetic reconstructions.
- The expanding limits of periodontal regeneration in changing tooth prognosis
  Perpascal Cortellini
- Modern peri-prosthetic approaches to the complex rehabilitations of the periodontally compromised patient
  Paolo Francesco Manicone, Luca Landi
- The role of periodontal plastic surgery in enabling ideal esthetics in the complex restorative case
  Francesco Cairo
- Prosthetic reconstruction of the natural dentition and the interdental papilla
  Emanuele Risciooti

12:00–13:15
Award Ceremony

13:15–15:15
Soft tissue recessions around implants: Prevention and treatment
- Risk indicators and prevention of mucosal recessions
  Hon Lay Wong
- Surgical treatment of mucosal recessions at implants
  Giovanni Zucchelli
- Prosthetic compensation of mucosal recessions at implants
  David Schneider
- Management of soft tissue recessions at periimplantitis sites
  Jurgen Becker

15:15–15:20
Closing Ceremony

Presentation dates and topics are subject to change. Last update was 4 September, 2014.
