Congress programme of the EAO Congress 2015

Thursday, 24 September
12:30–12:35
Welcome Address
Speaker: Björn Klinge

12:35–13:00
Osseointegration and brain control prosthesis
Speaker: Rickard Brånemark

13:00–14:15
50 years of clinical osseointegration—The early contributions and current effectiveness in implant dentistry
Per-Ingvar Brånemark concept
Speaker: Thomas Albrektsson
André Schroeder concept
Speaker: Daniel Buser
Willy Schulte concept
Speaker: Jörg Moyle

Effective in implant dentistry
Speaker: Jan Derks

14:45–16:15
Tissue regeneration/regeneration of peri-implant soft tissues
Speaker: Thomas Linkevicius

Tissue regeneration via the use of L-PRF
Speakers: Marc Quirynen & Andy Tenenman

14:45–16:15
Oral Communications

Friday, 25 September
08:45–10:15
Challenges for implant treatment of the ageing population

Biophosphonates—A threat or an option?
Speaker: Per Aspengberg

No teeth, no money; what to do in the elderly patient?
Speaker: Martin Schimmel

Minimal number of implants in the upper jaw
Speaker: Anja Zembic

Minimal number of implants in the lower jaw?
Speaker: Gerry Raghoebar

CAD/CAM, precision of fit
The future implant crown—chairside vs. labside
Speaker: Per Vult von Steyern

Is ceramic the material of choice for future implants?
Speaker: Eric van Dooren

CADCAM in removable prosthodontics
Speaker: Daniël Wismeijer

Oral Communications
10:45–11:15
New cells in old bodies
Speaker: Jonas Fratini

11:15–12:30
Consensus conference 2015
13:15–14:45
To learn from complications

Maxillary sinus grafting complications and how to avoid them
Speaker: Pascal Valentini

The surgeon as the complicating factor
Speaker: Franck Renouard

On the evolution of complications in implant prosthodontics
Speaker: Bjarni Pjetursson

What have we learned from mucogingival complications?
Speaker: Rino Burkhardt

What have we learned from immediate implant placement and immediate restoration?
Speaker: Markus Hämmerle

Virtual planning, 3D printing and more
The virtual patient: How far away are we?
Speaker: Thabo Breier

The origin, present and future of 3D printing
Speaker: Dianne Rekow

3D printing in maxillofacial surgery
Speaker: Lawrence E. Brecht

Do we still need to use Hounsfield scores in pre-surgical planning?
Speaker: Reinhilde Jacobs

Creating the virtual patient: How to integrate facial, optical and radiological imaging components
Speaker: Ali Tahmaseb

Invited societies programme
Immediate implant placement and restoration in patients with severe periodontal disease (potentially edentulous patients)
Speaker: Ye Lin

Osteointegration as a foreign body reaction
Speaker: Christer Dahlén

Brain signalling from teeth and dental implants
Speaker: Mats Trulsson

Poster presentation competition
10:45–12:15
Periimplantitis
The relevance of implant materials for periimplantitis
Speaker: Andrea Mombelli

The patient and the problem awaits Monday morning; what do I do?
Speaker: Stefan Reisert

Challenges in the treatment of peri-implantitis
Speaker: Olivier Carcasson

A comparison between periodontitis and periimplantitis lesions
Speaker: Tord Berglund

13:00–13:30
How to select a Nobel Prize Laureate in Medicine or Physiology
Speaker: Urban Leendahl

13:45–15:15
Emerging surgical concepts
Do we still need autogenous bone for ridge augmentation or can we use growth factors?
Speaker: Ronald Jung

Soft tissue grafts out of the box, what can we expect in clinics?
Speaker: Otto Zrh

Emerging concepts in maxillofacial surgery: indications for graft materials
Speaker: Henning Schliephake

The future of wound healing: can it still be improved?
Speaker: Nelson Pinto

15:15–15:30
Closing ceremony

Saturday, 26 September
08:45–10:15
Successful supportive treatment—evidence for clinical efficacy
Speakers: Hugo De Bruyn, Lisa Heitz Mayfield & Mariano Santolaria

Imaging (Radiology) in treatment planning and follow-up
Presurgical imaging in implant treatment: From guidelines to clinical use
Speaker: Michael Bornstein

Radiographic bone quality aspects in planning implant surgery
Speaker: Christina Lindh
