Friday, 5 June
08:30–10:00
Current state of the art in periodontal regeneration, ICC Auditorium
Speaker: E. Machtei
Advances in the management of infrabony lesions
Speaker: P. Cortellini
Advances in the management of furcation lesions
Speaker: P. Eichholz

Treatment of the anterior maxilla in challenging situations, Hall 1 (N20/N19)
Speaker: W. Giannobile

Patient stratification for periodontal medicine, Hall 2 (S22/S23)
Speaker: D. Nisand

MMPs as biomarkers of tissue damage, Capital Suite 7–12
Speaker: I. Urban

Diagnostic approaches for periodontitis, Hall 2 (S22/S23)
State of the art in the non-surgical treatment of periimplantitis
Speaker: A.M. Aass

Current approaches between instrumentation and decontamination of implant surfaces
Speaker: B.E. Kuru

Adjuvant use of local antimicrobials
Speaker: N. Arweiler

Periodontitis and cardiovascular disease, Capital Suite 7–12
Speaker: G. Serino

Is there a significant association between periodontitis and diabetes?
Speaker: F. D’Auto

Biological mechanisms linking periodontitis with diabetes mellitus
Speaker: P. Frenshall

Effect of periodontal interventions on glycaemic control of diabetes
Speaker: T. Kocher

Saturday, 6 June
09:00–10:30
Critical factors in bone regeneration therapies in the anterior maxilla, ICC Auditorium
State of the art in bone regeneration
Speaker: C. Dublin

Use of grafts
Speaker: I. Urban

Use of biological and growth factors
Speaker: Z. Schwartz

Prospects for novel biological treatments of periodontitis, Hall 1 (N20/N19)
Future avenues for the treatment of periodontitis
Speaker: K. Kornman

Prospects for use of resorvins and pro-resolution biologicals
Speaker: A. Kastner

Do Anti-Cytokine therapies have a role in the treatment of periodontitis?
Speaker: S. Cullshaw

Patient perspectives of periodontal diseases, Hall 2 (S22/S23)
How to assess patient related outcomes
Speaker: F. Graziani

Screening for medical conditions in dental settings: The diabetes paradigm
Speaker: E. Lalla

Impacts of periodontal disease on quality of life
Speaker: P. Bouchard

Aetio-pathogenesis of peri-implantitis, Capital Suite 7–12
Key factors in the aetiology of peri-implantitis
Speaker: B. Loo

Pathogenesis of the peri-implantitis lesion
Speaker: T. Berglund

Understanding the key risk factors
Speaker: G. Salvi

11:00–12:00
The bone of the alveolar process and the edentulous ridge, ICC Auditorium
Speakers: J. Lindhe

Bioengineering of teeth: A completely novel type of dental implant?, Hall 1 (N20/N19)
Speaker: P. Sharpe

Insights of periodontal therapy, Capital Suite 7–12
Speaker: N. Lang

12:45–14:00
25 years of European periodontology
Moderators: M. Sax & M. Tonetti

Tentative Programme of Europerio8, Friday & Saturday
