Experience the advantages of Hahn™ Tapered Implants

"The Hahn™ Tapered Implant System offers practitioners some distinct advantages: an easy-to-use surgical kit with length-specific drills, a thread pattern that engages the bone precisely as directed with a high degree of initial stability, and esthetic healing and restorative components for a natural emergence profile. Add to this the support of an industry-leading laboratory, and you won’t find a more complete implant system anywhere on the market."

– Timothy Kosinski, DDS, MAGD
Bingham Farms, Michigan

"The simplified surgical protocol of the Hahn Tapered Implant System has helped me boost my case efficiency, with the wide-ranging assortment facilitating predictable placement in all regions of the mouth. The implant performs exceptionally well in fresh extraction sites. Anyone looking to confront the challenges of implant therapy will appreciate the versatility and performance of this exciting new system."

– Paresh Patel, DDS
Mooresville, North Carolina

$160* per implant

IMMEDIATE LOADING

Achieve a high degree of primary stability, and facilitate nonfunctional provisionalization where indicated.

LIMITED SPACE

Robust 3 mm implant allows for restoration of narrow ridges and tight interproximal spaces.

MOLAR EXTRACTIONS

Wide-diameter implant ideally suited for "titanium grafting" of posterior extraction sites.
