Come see the latest in dental technology
Cornucopia of courses
By Fred Michmershuizen, today Staff

Hundreds of educational opportunities are on tap at the 103rd Thomas P. Hinman Meeting. Over the first two days of the meeting here in Atlanta, courses have been offered on how to build a better business office, how to get the most out of social media and even how to add Botox to your practice’s offerings.

Of particular interest on Friday was Hinman’s inaugural G.O.L.D. Program, an all-day series of lectures geared specifically toward those who graduated from dental school within the past 10 years. The courses, which were well attended, offered key insights into the benefits of practice ownership.

A course by Dr. Susan Maples on strategic marketing (subtitled “Choosing Your Best Patients Before They Choose You”) was also packed on Friday.

Highlights today include courses on how to get the most out of your lab, investing in digital impression technology and a 30-year history of the “hits” and “misses” of local anesthesia. Check your show guide for exact times and locations.

By Fred Michmershuizen, today Staff

The exhibit hall here at the 103rd Thomas P. Hinman Dental Meeting in Atlanta is filled with new and innovative products. Hundreds of companies are on hand to showcase the very latest in dental technology.

The goal, of course, is to send attendees home to their practices with better tools that will improve efficiency and, ultimately, make treatment outcomes better for patients.

Highlights on the show floor are many. Shofu Dental Corp. (booth No. 730), for example, has presented BEAUTIFIL Flow Plus injectable hybrid – a flowable base, liner and final restorative material approved for all indications, including Class II. According to the company, it is “the next step in the evolution of restorative materials.” Also available from Shofu: BEAUTIFIL Bulk Flowable, an advanced, Giomer bulk fill restorative material for base and liner placement in Class I–II posterior restorations, and Beautifil Bulk Restorative, a conventional packable composite resin.

DrQuickLook (booth No. 1247) is showcasing its DrQuickLook SD cameras, which have a 5-inch screen

*see TECHNOLOGY, page 2
and come with a 3 megapixel camera sensor and wand, all designed for clear, crisp intraoral images. With DrQuickLook, the doctor and patient can instantly review all saved images from a standard SD card by using toggle buttons on a touch screen. The SD Plus model of the camera allows the user to draw over images, so patients can clearly understand planned dental treatment.

For those who perform endodontic therapy, Essential Dental Systems (EDS, booth No. 1609) recently announced a new endodontic system, Tango-Endo. With the new Tango-Endo, it only takes two instruments, according to EDS. The files are designed to be tough and reusable and feature a unique, patented flat

along the entire length that allows for faster engagement with less resistance, increased flexibility without sacrificing strength and virtually eliminating instrument separation, according to the company. The Tango-Endo system includes its own reciprocating handpiece, designed to aid in the prevention of binding and to assist in the preservation of a canal’s unique anatomy. The kit also includes precision matched gutta-percha points.

TAUB Products (booth No. 508) is offering its new FUSION-Zr resin cements, which are self-adhesive and recommended for the permanent cementation of all-ceramic restorations, zirconia, lithium disilicate and CAD/CAM-type materials. According to the company, the cements work best for no-prep veneers, prepped veneers, crown and bridge and inlays/onlays and create an “exceptional” marginal seal.

These are just some of the many highlights in the exhibit hall, which is open until 3 p.m. today.
Sovereign Classic

Intelligent inside and out

Offers the industry’s first linkage between dental units and software for convenient remote access, customizable unit presets, and more.

Features automated infection control for a safer treatment environment.

6-position instrument console allows easy access to preferred instruments, with a Flexy™ holder for suction tubes and additional instruments.

Manual chair swivel and base allow the entire unit to be moved with minimal effort.

Perfectly symmetrical left/right capabilities.

Utraleather™ upholstery and ergonomic design ensure patient comfort during procedures.

Slim, compact cuspidor is ideal for any treatment room.

PLANMECA
There is a better way (and LVI can show you how to get there)

By Mark Duncan, DDS, LVIF, FAGD, FICCMO, Clinical Director, LVI

You know how those days go — all morning long, it felt like you were struggling to keep on track with the schedule. Your team is frustrated because they haven’t had their full hour lunch more than one day a week in as long as they can remember.

You walked by the sterilization room 15 minutes ago, and it sure sounded like they were complaining to each other because you said to work in that emergency, and they were struggling to figure out how to pick up their kid from daycare on time. Again. You want them to enjoy working here, but you have to be able to pay the bills. And your best assistant asked you again if she can have that raise you have been promising her. Don’t they understand?

Today will be another day of three chairs and patient after patient asking you questions about treatment, all eager to get started with getting their mouth fixed, but yet you still won’t see any of them show up on the schedule. They said they wanted to do the work, but for some reason, they never seem to come back and do it.

They say insurance doesn’t cover it, or they ask for a pre-determination. TOO bad they don’t know the pre-determination doesn’t mean much.

Today, you have 27 patients on your schedule and will work your butt off and still not have a chance to pee. It looks like you should be able to be done by 5, but today will finish worse than yesterday.

It feels like half of your patients are crankier than you are, and your team isn’t really talking to you today, and you know when you get home, all you will want to do is go to sleep and wake up on Saturday — except it’s still Tuesday!

It doesn’t make sense — you have taken C.E. courses every time they come to town. The new insurance plan was supposed to make things easier. You bought a bunch of new equipment to save money on taxes — of course now you have to pay for it every month — but why does it seem like the harder you work, the further behind you get? There has to be a simple reason.

Well, it turns out there actually is — and it’s something that you learned when you were about 5! Do unto others.

More specifically, build systems in your office so that you can treat your patients the way you would want to be treated — comprehensively and with exceptional information to make good decisions — and produce a consistent experience time after time.

While doing that, add exceptional care — esthetic adhesive excellence like you see in the journals. But how? Well, the answer happens to be the foundation that LVI was built upon — building the excellence in a patient-centered practice. And the programs at LVI have been teaching clinical excellence and communication and business systems for almost 20 years to help doctors do a better job of not only seeing the patient but, more importantly, connecting with them.

Two decades of not only communication but comprehensive diagnosis and clinical excellence. As a result, the doctors at LVI have a statistically higher professional satisfaction and income.

Isn’t it time you go find out what they are doing differently? Yes. Yes, it is — and congratulations on the journey you are about to start.

Are you having difficulty extracting teeth? Are you referring many of your patients? Do you wish your extractions could be more predictable? Do you wish to master immediate implant techniques? If you answered yes to any of these, the Extraction Academy is the answer.

The Extraction Academy will teach you about all extraction procedures. Topics include full-mouth extractions, impacted teeth, how to expose teeth for orthodontic treatment, wisdom teeth (any impaction category), calcified teeth, fully and partially erupted teeth, infected teeth, root tip extractions, complex cases, head and neck anatomy, pharmacology, intravenous sedation, guided bone regeneration, tips and tricks, complications management, immediate implants, surgical instruments, nomenclature, proper use and application.

Through a blended learning platform, the Extraction Academy will provide all the tools you will need to learn, practice, improve and implement your daily treatments.

The Extraction Academy specializes in continuing education workshops and lectures for general dentists, periodontists, oral implantologists, oral surgeons and endodontists. Courses are designed around practical hands-on lectures.

The next course will take place May 3 in Anaheim, Calif. Cost is $1,750 (with a $150 coupon discount). The course fee includes course instrument rental, course documents, online education and C.E. unit certification.

Register online at www.extacademy.com or contact info@extractionacademy.com or call +32 486 920 435 for more information.

SternSnap

**OVERDENTURE IMPLANT ABUTMENT SYSTEM**

- Sterngold Dental, a leader in dental products, launched the new SternSnap Overdenture Implant Abutment System, which can be used to retain overdentures on some of the most popular implants.

  The system features a low profile that takes up only 2.5 mm of height in the denture. It has a long-lasting plastic retention cap that comes in three retention levels (1 lb, 2 lb and 3 lb) and doesn’t require a metal housing, making it a simpler, more economical option, according to the company.

  Founded in 1897, Sterngold Dental specializes in alloys, attachments, implants and restorative systems. Examples are the Stern ERA family of resilient dental attachments and the Natural Profile Abutment System for esthetic restoration of osseointegrated implants.

  For more information, visit www.sterngold.com, call (800) 243-9942 or stop by the booth, No. 2013, here in Atlanta.

The annual AACD Scientific Session, taking place May 6–9 in San Francisco, will offer attendees so much more than the traditional hands-on workshops and lectures. This year’s educational lineup incorporates specialized courses to fulfill every dental professional’s niche.

Live dentistry in the exhibit hall
Live dentistry was one of the most sought-after educational sessions at AACD 2014. Register now to take advantage of this year’s sessions, featuring AACD’s best: Dr. David Hornbrook, Dr. Jeff Brucia and Dr. Brian LeSage. This live dentistry experience, “Education in the Round,” was created in partnership with the American Dental Association. The goal is to provide attendees with real-life demonstrations of procedures for which AACD dentists are highly recognized.

Blended Education
Blended Education, offered jointly with Cosmedent, offers attendees the opportunity to earn up to nine C.E. credits through the completion of several online courses and one on-site course taught by Dr. Bud Mopper. Details for blended education can be found at www.aacd.com/blended.

International Summit
The International Summit comprises a group of presenters representing AACD affiliates from around the world. The AACD has offered these individuals the chance to present in one-hour time slots at the meeting to educate attendees about clinical advances, from smile design and patient/dental psychology to techniques for biomimicry and lasers.

‘Cosmetic Dentistry: The Next Generation’
Gain insight from cosmetic dentistry’s next generation of leaders during “Cosmetic Dentistry: The Next Generation.” Featuring five up-and-comers in the industry, this session will open your mind to new perspectives on dentistry from young dentists who are eager to share their passions – from implants to periodontics to digital smile design – with you.

AACD power sessions
Learn about the latest in marketing, practice management and implants in these quick-bite power sessions, created to energize and inspire you. Featuring some of AACD’s most popular educators, these sessions – internet marketing, implants and practice management – are a perfect addition to your already solid educational lineup, according to the AACD. Visit www.aacd.com/powersessions for the complete list.

Member Pearls in the exhibit hall
Member Pearls offer attendees the chance to learn from select AACD members on new and innovative topics in a 30-minute format. These sessions – from esthetic orthodontics to tissue reconstructions around implants – are among some of the most popular at AACD meetings.

Lab tech track
AACD understands the pivotal role laboratory technicians play in achieving an ideal final result. New this year is a special lab focus program, offered in partnership with Spectrum Dialogue.

Team track
AACD 2015 offers education to bring dental teams together, with topics including whitening, smile design and photography, communication and more.

Practice management track
Being a dentist means you give your patients the smiles of their dreams, but it also means you’re running a business. Learn how to maximize your practice’s profitability and potential with these courses.

To attend
For more information about these and other courses available at AACD 2015 in San Francisco or to register, visit www.aacdconference.com.

BRING THIS AD TO BOOTH #35
AT THE THOMAS P. HINMAN DENTAL MEETING FOR A SPECIAL OFFER

NOW EXPANDED TO SIX PATIENT FRIENDLY SIZES
The **ECLIPSE™ LED**

Introducing the Touch-Free LED Headlight from SurgiTel. The Eclipse™ LED. Featuring Eclipse™ sensor technology, which turns the light on/off with a wave of the hand.

- Avoid the risks of cross-contamination
- Wave it on when you need the light, wave it off when you don’t
- Consult without blinding patient/assistant
- Conserves battery life

---

80% of Dentists Experience Work-Related Pain. Is it because of non-ergonomic loupes & lights?

---

**SurgiTel Front-Lens-Mounted Loupes (FLM)**

- Truly customizable declination angle
- Precision optical alignments with patented arm stabilizers and divergence elimination technology

**SurgiTel Through-the-Lens Loupes (TTL)**

- Designed for best ergonomics
- Truly custom declination angles (DA) up to 65 degrees

---

Let your loupes do the work, not your neck!!

"I feel that SurgiTel is way ahead of the game compared to their competitors in ergonomic features. The extremely light weight and easily customizable features are much better than other brands in the overall comfort of the practitioner. At different times in the past 3 years I have wondered if I would have to change careers due to too much pain. Thanks to SurgiTel I no longer have to worry."

Darryl Hatchett, DDS
Denton, North Carolina

---

Dentists, Hygienists, Surgeons and Ergonomists all Recommend SurgiTel
