Look back, move forward

ICOI celebrates 40 years with insight into implant dentistry’s innovations, complications and controversies

For 40 years, the ICOI has been educating clinicians on implant dentistry, along with all the innovations, complications and controversies that go with it. During the next two days, the ICOI World Congress will honor that history and look back at where this one fledgling “study club” came from.

What once was run from the office of ICOI co-chair Dr. Kenneth Judy now occupies an entire floor of an office building in Upper Montclair, N.J. What

When you’ve considered all the options, isn’t it time to consider

Expanding implantology with more treatment options

ANEW is the only narrow-body implant with a screw-retained prosthetic system and with over 10 years of clinical experience & research to support safe and reliable long-term use.

Available in 1.8, 2.2 & 2.4mm diameters and three thread lengths. With a tapered apical end, ANEW Implants can be placed in interdental spaces as narrow as 3.5mm without the need for bone augmentation or orthodontic interventions.

For more information visit www.DentatusUSA.com or call us at (800) 323-3136
Once started as a small group of clinicians has now grown to encompass more than 13,000 dues-paying members and spans all continents except for Antarctica.

This week’s World Congress XXIX was created and prepared by Dr. John Russo and includes a diversified and international faculty. Some of the topics to be covered include cone-beam CT diagnosis and treatment planning; the use of growth factors including stem cells; digital impressions from the perspectives of the clinician and the laboratory; and diagnosing, preventing and treating soft-tissue esthetic complications.

In addition, there are more than 100 implant dentistry-related exhibitors just waiting for you in the exhibit hall to show off the newest and most advanced products and technology.

Here is a look at some of the highlights of the scientific program for today and Saturday.

**Today**
- 1:30 to 2:30 p.m. — Dr. Carl Misch: “Prosthetic-Related Complications”
- 2:30 to 3:30 p.m. — Dr. Rick Ferguson: “Bone Grafting – Misconceptions and Strategies for Predictable Success”
- 5 to 6 p.m. — Dr. John Russo: “Reduce Complications, Increase Confidence, Achieve Excellence”
- 7 to 8 p.m. — Awards ceremony

**Saturday**
- 8 to 9 a.m. — Dr. Bach Le: “Management of the Ailing Implant”
- 9 to 10 a.m. — Dr. Pablo Galindo Moreno: “Bone Level Stability Around Implants Placed in Pristine and Grafted Areas”
- 10:30 to 11:30 a.m. — Dr. Maurice Salama: “Contemporary Reconstructive Hard- and Soft-Tissue Surgery: Myths, Realities and Future Trend in Dentistry”
- 1:30 to 2:30 p.m. — Dr. Alan Fenner: “Subcrestal Implant Placement to Optimize Soft-Tissue Esthetics – Controversy and Practicality”
- 4 to 4:45 p.m. — Dr. Scott Ganz: “A Comparison of Interactive Software Applications in Assessing the Reality of Anatomy: Diagnostics and Implant Planning Accuracy”
- 6 to 6:30 p.m. — Dr. Konstantinos Valavanis: “Perimplant Tissue Design: Parameters and Key Factors for Optimum Esthetics”
