Seeing is believing

Check out a product demonstration of Beautifil Flow Plus — now offered in four shades

Shofu Dental is holding product demonstrations at booth No. 1530, featuring its injectable hybrid restorative, Beautifil Flow Plus. Now available in four shades — B1, B2, C2 and D2 in two viscosities — Beautifil Flow Plus gives dentists more aesthetic treatment options at their fingertips.

Beautifil Flow Plus combines hybrid-like strength and functionality, unique handling and stackability and a flowable delivery. Additionally, it has 15 percent more radiopacity than enamel and offers the benefit of fluoride release and rechargeability.

According to Shofu, Beautifil Flow Plus represents the next step in the evolution of restorative materials, based on its convenient flowable delivery system and its physical properties and functionality that rival leading hybrid composites.

Brian Melanokos, president of Shofu Dental, said he has been very pleased with the success of the product. "We’ve always known that we have an amazing product on our hands — but none of us imagined how quickly it would catch on," he said.

Unlike other flowables, Beautifil Flow Plus has stay-put handling and physical properties that allow use on the occlusal surface and marginal ridge, eliminating the need to pack a hybrid composite on top.

A flowable base, liner and final restorative material, Beautifil Flow Plus is approved for all indications (Class I–V). With a smooth, self-leveling consistency, the material leaves a tight marginal seal on the bottom and a smooth, ready-to-polish surface on top.

Moreover, Shofu’s proprietary S-PRG (surface pre-reacted glass) technology provides sustained fluoride release and recharge that can’t be found in other composite materials.

Beautifil Flow Plus is available in two distinct viscosities. F00 (zero flow) offers precision stacking, and F03 (low flow) is an ideal base/liner.

For a limited time only, Beautifil Flow Plus is available in two introductory kits. The standard kit (PN 2000S) offers two 2.2-gram syringes of both viscosities in shades A2 and A3, and the pedo kit (PN 2000P) offers two 2.2-gram syringes in both viscosities in shades A1 and bleach white.

Both kits also contain samples of Shofu’s seventh-generation bonding agent BeautiBond, One Gloss, Super Snap and Shofu’s hybrid material, Beautifil II. The kit retails for $102.25 (a $160 value).

Stop by the Shofu booth, No. 1530, to see Beautifil Flow Plus for yourself.
