We just made bonding better. **Again.**

**Reliance Orthodontic Products**

is proud to introduce

**GoTo™**

- Single piece flash clean up - “roping” off the tooth
- No bracket flotation
- At a fraction of the price of similar bracket adhesives

**KNOWLEDGE. DEDICATION. EXPERTISE.**

Thanks to your feedback and input, Reliance is proud to offer **GoTo™**, the new standard in light cure bracket adhesive. Available in push syringe or pre-loaded tips.

See us at the AAO Meeting, booth 2221
Dr. Neil Warshawsky and Dr. Adam Schulhof at the 3M booth, No. 419. During the weekend, both doctors presented on 'A New Addition to the Clarity Esthetic Portfolio, Providing Doctors Control, Choice and Flexibility’ at the Leaning Lab inside the 3M booth. Warshawsky is the founder and owner of Get It Straight Orthodontics, a leading-edge orthodontic practice in the Chicago area, while Schulhof is a board-certified orthodontic specialist who runs a state-of-the-art private practice, The Schulhof Center, with locations in New Jersey and New York.

From left: Luke Lumpkin, Mike Mattscheck, Joanne Padula and Bryan Epstein of OrthoAccel Technologies (booth No. 1033).

Sourena Ghandehari, left, and Steve Bigelow of Dentaurum USA (booth No. 411).

Orthodontic professionals visit the AAO exhibit hall Sunday morning.
You can’t be a Superhero without a little training!

Steps to becoming a Superhero in your practice:

1. Call team tops.
2. Absorb our powerful practice management secrets from our certified instructors.
3. Watch your staff embrace the fast, easy, and reliable powers of topsOrtho™.
4. Outfit your happy staff with their Superhero capes!

Superlative training is just one of the many benefits of putting topsOrtho in your practice. A certified instructor will spend 3 days training your staff where each area of the practice will be fully engaged. Once your staff has completed training, they become Superheroes too.

Call +1 770.627.2527 or email sales@topsortho.com.
The clear alternative has arrived

iTero Element 2 and iTero Element Flex
Align Technology introduced two new iTero Element® scanners here at the 118th American Association of Orthodontists Annual Session, booth No. 501. The expansion of the iTero Element scanner portfolio builds on the existing high-precision, full-color imaging and fast scan times of the current iTero Element scanner.

The iTero Element 2 scanner (above right) is equipped with next-generation computing power that enables 2X faster start-ups and 25 percent faster scan processing time, as compared to the current iTero Element. The iTero Element 2 provides improved screen resolution while minimizing scanner footprint because of its slim 21.5-inch monitor and 16:9 widescreen viewing format. The integrated lithium-ion battery provides easy mobility from operatory to operatory without the need to plug in for power or reboot.

The iTero Element Flex (above left) wand-only configuration is a portable scanner for easy transport from office to office, allowing doctors to leverage the power of chairside visualization coupled with iTero scanning precision in any location. It’s perfect for practices with multiple locations who need a scanner that is convenient and easy to transport. Working seamlessly with compatible laptops, practitioners can now scan anywhere, even in the smallest of operatories. The iTero Element Flex includes a convenient, custom-designed carrying case.
