Open up and say ahhhhhh

New MICRO-TOUCH DENTA-GLOVE series is designed just for dentistry

By Ansell Staff

Ansell, a global leader in protection solutions and maker of the popular Microflex® and MICRO-TOUCH® examination gloves, has launched its MICRO-TOUCH DENTA-GLOVE® series, a highly diversified portfolio of dental examination gloves, which, according to the company, outperform the competition. MICRO-TOUCH DENTA-GLOVE is the first series of examination gloves developed specifically for the needs of dental professionals, according to Ansell.

Certified for use in oral exams

All products in the series are certified for use in oral examinations for patient safety and peace of mind and are designed with the most advanced film technologies to meet the unique and demanding needs of the dental profession, the company asserts.

The products are tested for biocompatibility and feature inner coatings to promote hand health.

For more details about MICRO-TOUCH DENTA-GLOVE examination gloves or to request a free sample, you can visit www.ansell.com/DentaGlove.

Here in Columbus

To learn more about the MICRO-TOUCH DENTA-GLOVE examination gloves and for free samples, stop by the Ansell/Microflex booth, No. 219.
